

Soleil Insulation Co. Retrofit Insulation Partitions for Curtain Wall Buildings¹

Notes:

- Two typical 25 story 500,000 sq. ft. buildings, one in Los Angeles, CA and the other in New York, NY. Each 12 ft. floor-to-floor; 25% single standard glazing; 70° F inside temperature year round; BTU reduction excludes savings from infiltration and fenestration improvements inherent in the Partition System.
- IR (infrared radiation): Defined in footnote 3 on page 1.
- IR %: Percentage of IR passing through: e.g. 94% of IR passes through a common red clay brick.
- R (R-value): Defined in footnote 2 on page 1.
- Partition panels interlock near seamless. Owner approved partition finish.
- Owner determines vertical dimension.
